

Hello,

my name is Agnieszka Ochim-Koproń.

I have a master's degree in economics and a doctorate in psychology. I recently completed the Google Data Analytics course.

This catalog will contain data along with their analysis and conclusions, which are the result of my learning during the course and show the practical use of tools such as spreadsheets (Ms Excel), SQL, Language R in data analysis.

I believe that my work will provide you with a lot of fun, joy and interesting discoveries by showing how data analysis can draw conclusions and make data-driven decisions.

Have a good time!
